Improving Soil Health and Structure

Please join Catchment Sensitive Farming (CSF) and Innovation for Agriculture (IfA) to discuss how to improve soil structure, health and workability using soil assessments:

- An introduction to soil health
- Assessment of soil texture, structure and compaction
- On-farm options for improving soil health
- Farm walk (weather dependent)

- Lunch provided

- 5 BASIS points available

Booking

To book a place please contact farmevents@naturalengland.org.uk or 0208 026 8780 quoting event reference number: SEWS373
