

Strategies to prevent disease; save time and money on your dairy farm

19th March 2018, 10:00 – 14.00

Venue: Sussex Rural Business Hub, Plumpton College, Ditchling Road, East Sussex, BN7 3AE

Experienced at talking with farmers; IfA's livestock team will be on-hand to explain to you, in plain terms, what antibiotic resistance actually means and why there is a demand on the industry to reduce the use of antibiotics in livestock.

We will highlight the reduction targets that have been set for the dairy sector, and provide you with practical and achievable tips that can help to prevent disease, save time and money on your farm.

This workshop will focus on three key areas:

Vaccination protocols

- Why vaccinate?
- Which diseases should you vaccinate against?
- Fridge management tips to ensure vaccine effectiveness, and maximise the return on your investment

Sensor technologies for early disease detection

- Want to be able to detect disease before it becomes a clinical case?
- Latest technologies and their benefit in identifying early signs of disease

Breeding

- How to improve your herd genetics for improved immunity

Places are limited, so booking is essential
Lunch provided
